Forty-six members were in attendance at the recent Home and School Association meeting. The attendance banner for best representation of parents of pupils of each room at the meeting was won by Miss Carlson's room.

The postponed library fund tea and sale of home cooking was again discussed. The tea and sale will now be held on Saturday, April 28, from 3 to 9 p.m.

A report on the blanket raffle showed the sum of \$70.25 netted to date. A suggestion by Mr. S.J. Garrett was adopted and a movement was started to plant trees around the school.

The program for the forthcoming school commencement in June was also discussed.

Legion members Monday evening discussed plans for the community auction sale and a tentative date of May 5 was set. Noah Boese will be contacted to see if his services are available on this date.

The sale will be held north of Art's Auto Body Shop and posters will be out shortly.

Those wishing to put articles in the sale are asked to list them with any Legion member or at the Chronicle office.

Bill Ross has resigned his position as manager of the Carbon branch of the Builders' Hardware & on Wednesday the new manager, Mr. Carleton Leeson, took control. Mr. Leeson is a married man and comes from Didsbury, where he was employed at the Builders' Hardware store located there.

Mr. Ross will remain in Carbon until future plans are decided.

Mrs. Doug Prowse injured the fingers of both hands Friday morning when they were jammed in the door of the school bus as it slammed shut in the strong wind. She was taken to Drumheller hospital for emergency treatment.

Louis Zamperini of Los Angeles, war hero and Olympic track star, will be guest speaker at a Youth for Christ Rally in Carbon Baptist Church Friday evening, April 27. Mr. Zamperini has one of the most thrilling and unusual testimonies of anyone who has ever travelled in Youth for Christ work.

Zamperini was one of the Olympic stars who travelled to Germany in 1936. He is holder of the collegiate mile record. While in Germany he stole a swastika from Hitler's chancellery, was shot at and reprimanded, but allowed to keep it.

During World War II his plane crashed in the Pacific and eight crew members were killed. God miraculously saved Zamperini. He was taken to Japan and spent over two years in a concentration camp.

He is listed as one of the ten men who suffered most in concentration camps during the last war. All he testifies to is verified by the war office at Washington. Life, Time and Newsweek have all carried reports about him.

Grandmother 11 Times

Former Manitoban Recalls
Early Days Of Curling

VANCOUVER. — She's small, shining and a grandmother 11 times over—and she's been curling off and on for over 40 years.

Mrs. John Rudd, who calls Crandall, Manitoba, "home", curled in the women's bonspiel here, after nearly ten years away from the ice, and with a length of service to the game that would win respect from the hardest prairie curler.

Mrs. Rudd first curled on natural ice in Crandall, way back—and she's a little sheepish about the swift-moving years—in 1906.

One year later that first old rink in Crandall died a natural death, as old age condemned it to uselessness.

But the Crandall community, all stout curlers, got together and put up a new one, just before the opening of World War I, and Mrs. Rudd and her rink went on with their rock-throwing.

This rink bravely withstood the prairie winters only to burn down later when the electricity failed.

Undaunted, Crandall built yet another rink, but Mrs. Rudd—who between times raised five

young curling Rudds—never did curl in the new rink.

Then, eight years ago, she and her husband took to spending their winters here, and six years ago moved west for good.

This year, a good decade after her last spell of curling, Mrs. Rudd joined the Women's Afternoon Curling Club here.

The grey-haired grandmother, who stepped onto a rink in Crandall as a slim young girl, will go on throwing rocks at the local club in proof that a real curler never gets too old.

For her, it's like being "home" again.

Organize 4-H
Club In Manitoba

BRANDON, Man. — The first provincial 4-H club ever organized in Canada was set up in Brandon during the Manitoba Winter Fair.

Ernie Pritchard, of Roland, was elected president. T. A. Moffatt, is vice-president and directors are: Olive Douglas, Minnedosa; Mrs. Nick Rath, Ste. Rose du Lac; Mrs. Frank Brown, Lac du Bonnet, and D. L. Fletcher, agricultural representative, Shoal Lake.

W. S. Frazer, assistant director of the extension service, department of agriculture, is secretary-treasurer.

"One of the objects of the new association is to develop junior club programmes in Manitoba," Mr. Frazer said. "Our programme for this year is to send one club leader, and two club members (one boy and one girl) to the 4-H club congress in Chicago next fall. We will also send a club leader to the national club contest during the Royal Winter Fair in Toronto next November."

Six hundred local clubs in Manitoba are participating in these objectives.

CONSIDER YOUR FEET

Human feet are one of the finest examples of nature's engineering. Don't ruin them with improperly fitting shoes, and make sure the body's weight is properly distributed on the feet.

B.C. Area Bids
For SecessionAgitation Started In
Northern Peace River Area

VICTORIA, B.C. — Agitation has been started in the British Columbia part of the northern Peace River area for secession to Alberta, Glen E. Braden, Coalition Member of the B.C. Legislature for Peace River, said.

He had been informed a group of citizens has been organized to advocate such a move.

He was unable to say how strong the movement is but he had received requests for information on the procedure to be followed for a break-away.

Reason for the action is the geographical and economic position of the rich farming area and potential oil field in relation to the rest of B.C.

The people of the "block" are closer to Edmonton than any other city and communication with the Alberta capital is comparatively easy.

Willard E. Ireland, provincial archivist, said the procedure the secession agitators must follow is first to present a petition to the B.C. Legislature.

This would have to be approved by the House. After that, Alberta would have to agree to extension of its boundaries to take in the new area.

Finally, Parliament would have to rule on it, as laid down in the British North America Act.

In a recent speech at Vancouver, Premier Byron Johnson said the entire economy of the Peace River was merged into Alberta's.

He said the Peace would be developed as part of B.C. only if a proper line of communication were provided between Prince George and Dawson Creek.

Seventy permits covering 9,242,189 acres of land have been issued for oil exploration in the Peace.

Move To Control
Fund Campaigns

EDMONTON. — The Alberta government will start next July 1 to regulate organizations that raise funds for health services by voluntary public contributions.

They will be required to supply the government with full particulars before a campaign and, upon completion, financial statements showing contributions, expenses and disposition of the proceeds.

Farm Help Needed
In Saskatoon Area

SASKATOON. — The national employment service office here reported "very strong" demand for experienced farm help from areas south and southwest of Saskatoon. Demand

from farmers east and north of the city is not expected to develop until May 1.

R. H. Bowers, manager, said experienced men are averaging \$100 monthly with board and room, with work promised through the fall.

Think Right—Eat Right—Live Right

Short and Sweet
Bake it with MAGIC!

MAIZE & ORANGE SWEET BREAD

Mix and sift 3 times, 2½ c. once-sifted pastry flour (or 2¼ c. once-sifted hard-wheat flour), 3¼ tps. Magic Baking Powder, ¼ tsp. salt, ¼ tsp. ground mace, Cream ½ c. butter or margarine and blend in ¾ c. fine granulated sugar; beat in 1 well-beaten egg, 1 tsp. grated orange rind and ½ tsp. vanilla. Add dry ingredients to creamed mixture alternately with ¾ c. milk. Turn batter into a loaf pan (4½" x 8½") which has been greased and lined with greased paper. Bake in moderate oven, 350°, about 1 hour. Allow loaf to cool in pan. Spread sliced cold bread with butter or margarine for serving.

Funny and
Otherwise

Gertie: I heard your new boy friend is very polite.

Bertie: Oh, yes. He has excellent manners. Every time I drop something, he kicks it over to where I can pick it up more easily.

She: I've tried to learn to love you, but I can't.

He: But I've saved fifteen thousand dollars for us.

She: Give me one more lesson.

Woman: My husband talks in his sleep.

Doctor: I'll give you something to quiet him.

Woman: No, I want something to make him talk louder. I can't quite make out what he says.

Judge: Why did you hit your wife with a lamp?

Defendant: Because the chair was too heavy to lift.

A very thin man met a very fat man in the hotel lobby.

"From the looks of you," said the fat man, "there might have been a famine."

"Yes," was the reply, "and from the looks of you, you might have caused it."

Husband: Dear, do you think it's right to get angry with people when they're not responsible for something?

Wife: Of course not!

Husband: Well, I wasn't very responsible for the eggs you sent me to buy. I dropped every one of them.

The farmer had given an old Irishman permission to sleep in his barn.

That night the farmer went round to see that the man was comfortable, and found him lying on a heap of straw with a drain-pipe for a pillow.

"Don't you find that pipe hard?" he asked.

"No," said the Irishman. "I've filled it with straw."

"What is a cannibal, Dad?"

"Well, if you ate your mother and me you'd be a cannibal."

"Oh, I thought that was an orphan."

Itching Scalp—
Loose Dandruff

Try This Home Treatment
For Quick Ease and Comfort

Here is a clean powerful penetrating oil that brings speedy relief from the itching torture and discomfort. Don't dig with fingernails, that only serves to spread the trouble. Just use equal parts of Moore's Emerald Oil and olive oil. Apply gently with the fingertips once a day and shampoo every fourth day. You'll find this treatment not only soothes the itching and torture but helps promote more rapid healing—loose floating dandruff becomes a thing of the past. Scalp clears up and hair begins to thicken. You can obtain Emerald Oil in the original bottle wherever drugs are sold.

NOW! Get Quick Relief
from Sore, Painful PILES
A Candid and Honest Discussion on a Delicate Subject

Since the dawn of civilization, medical men have been fighting a ceaseless war—to save lives and to conquer dread diseases.

When they discover a new "miracle" drug or surgical technique, the news rings round the world! Yet all the while, other "unsung" men of science are working equally hard to relieve suffering caused by less dramatic, "everyday" maladies. Among them is perhaps the most painful of all—piles!

A Subject Seldom Discussed
Pile sufferers are burdened with a double hardship. They yearn for relief, but hesitate to seek it because of false pride and embarrassment. Yet to the man or woman who knows the agonizing torment of itching, burning piles, the truth about their trouble may mean a world of difference in business efficiency, in social pleasure, in good looks and vitality!

What Causes Piles?

Piles are not a primary ailment. Conditions which cause them never originate in the parts affected. At first, piles are simply inflamed and distended "varicose veins" in the delicate membranes of the rectum. A common cause is hepatic congestion (torpidity of the liver) which results in ordinary, everyday constipation.

IMPORTANT! Here is frank information—in non-technical language—regarding an annoying, painful, often embarrassing physical condition which now afflicts countless thousands—you, perhaps, among them. Far too frequently this condition, at first superficial in itself, can be Nature's warning of more serious trouble to come. We believe everyone who suffers from this condition owes it to his or her own personal comfort to read the statement below.

LEONHARDT PROPRIETARIES, LTD.

How Piles Develop

As the liver function slows down, blood flow from the lower bowel to the liver is retarded and small rectal veins swell with blood. Then, usually, constipation starts. Hard, clogging masses form in the lower bowel—irritating and bruising the distended rectal veins. Blood stagnates in and around areas, until the tiny veins become greatly inflamed, lumpy, horribly painful.

This agonizing pain aggravated by constipation, is "self-perpetuating". The constipation adds to the itching, burning pain and soreness—which in turn increases the constipation—which then tends to further enlarge the swollen veins until they become pile tumors. If this vicious circle is not broken, there is only one choice—chronic piles or the surgeon's knife!

Why Face This Choice?

Decide now to break this

vicious circle! Many others have done so, thanks to an able professional man who, more than 50 years ago, began an intensive study of piles—their cause and effect. Knowing that piles are caused by congested conditions inside the body, he wisely searched for an internal medication that would relieve hepatic congestion, stimulate bile flow, gently ease constipation and improve circulation of the blood in the lower bowel—thus helping Nature herself promote a healthier condition in the sore, painful areas where piles are found. Finally, in his own practice, he devised a formula of medically-proven elements—small tablets taken by mouth—which showed amazing results in 88 out of 100 cases that came to his personal, professional attention!

Sufferers Acclaim Hem-Roid

He gave his formula the trade name of Hem-Roid—using it first

in his own practice, later supplying it to friends and acquaintances. In 1904 he sold the formula and name. Since that time, millions of packages have been bought by the public throughout the world—and countless satisfied users of Hem-Roid testify to its quick, efficient action.

Accept This 10-Day Offer!

Naturally—long-standing, neglected cases of piles may call for a doctor's advice. But for average pile conditions, we know nothing better than Hem-Roid to give you the relief and results you want. To prove it, we make this special 10-day offer!

Now from any drugstore, get a package of Hem-Roid—60 tablets, 20 full days treatment—at the amazingly low price of \$1.50. Use the tablets exactly as directed for 10 days. If at that time you are not delighted with results you get, just return the package with unused tablets to your druggist for full refund of the purchase price! You risk nothing—and you stand to gain immeasurable relief from the embarrassing discomfort and torment of itching, burning piles. Ask for Hem-Roid—today!

PEGGY

World's Greatest Irrigation Plan To Put Million Acres To Work

By RICHARD H. SYRING
(Central Press Correspondent)
MOSES LAKE, Wash. — Man's greatest hand-made farm frontier came officially into being here on March 15. The United States bureau of reclamation has chosen 90 lucky numbers out of 907. From these 90 potential farmers 30 will be chosen to buy government-owned tracts of land about three miles north of here in central Washington. They average 83½ acres each.

The acres involved are few. But the significance is tremendous. It means that after spending nearly \$390 million, Uncle Sam is about ready to turn the water on in the Columbia basin irrigation project. Largest of its kind in the world, it encompasses more than a million acres.

By March or April of next year, water will come gushing down dry irrigation ditches to start the conversion of thousands of sagebrush-covered acres into lush growing fields. The life-giving water will come from the Columbia river, some 50 miles away, pumped for the first time by giant Coulee dam.

Planners dreamed of this huge irrigation project many years ago. It wasn't actually started until the summer of 1945. Now the number of storage basins, canals and laterals are about 54 per cent. completed, say reclamation men.

Only 87,000 of these arid acres will be touched by water next spring. Since the government owns about 20 per cent. of the 87,000, there will be more drawings later this year. All will be in readiness—homes built and wells dug and equipment purchased—so crops can be planted next spring.

According to the reclamation bureau's schedule, each year after 1951, from 60,000 to 70,000 acres will be added to the nation's productive cropland.

When the project is completed a few years hence, enough revitalized farmland will come to life to support 85,000 persons on more than 14,000 new farms. Government planners say thousands of new jobs will be created for tradespeople to serve the farmers.

The rich soil, only lacking water, will grow grains, hay, all kinds of vegetables, fruits, dairy products and sugar beets.

Reclamationists say it takes four million acres of farm land to feed one million people. Since the U.S. population is increasing at the rate of one million yearly, the whole Columbia basin project, when completed, will only feed one-fourth of the annual growth.

The prospects of new farms next year and the vast construction program in the last six years, have brought unknown prosperity to Moses Lake and other little towns in the area.

Economists estimate that some day \$100,000,000 in produce will come from this revitalized land. The soil is rich, only lacking water. Much of it was homesteaded 35 to 45 years ago, but too many drought years caused the original pioneers to pull stakes.

Nearly three years ago, some 50 war veteran farmers were allowed to buy land in the south end of this huge project, near Pasco. Until water reaches the soil through the main project, it is being irrigated by special pumps along the banks of the Columbia river which is not too far away. The result: some 5,500 acres grossed an average of \$98 per acre.

H. T. Nelson, regional director of the bureau of reclamation, says the 30 farms to be sold in March will average from about \$8 to \$30 per acre. Terms will require 20 per cent. down and the balance in 20 years. War veterans will get preference, if they can qualify—\$4,000 cash

or credit, two years of farming experience and some good references.

Money spent on the project, to date, totals more than \$390,000,000, of which \$180,000,000 represents the cost of Coulee dam. Total cost of the project, including the dam, will come to a staggering \$715,100,000.

Water for the irrigation will come from behind Coulee dam. Mighty pumps will carry it upwards and across two miles to an equalizing reservoir. From this 27-mile-long reservoir, it will be allowed to gush through the hundreds of miles of canals and laterals.

FLOCKS OF RAVENS PLAGUE FISHERMEN

PRINCE ALBERT, Sask. — Flocks of ravens ranging over northern Saskatchewan are keeping fishermen and trappers on the jump.

The airborne predators are robbing fish nets, eating fish left on the ice overnight by fishermen, and ruining pelts of trapped fur-bearing animals.

"They're as wily as a wolf," said one trapper. "If you are carrying a gun they keep their distance, but if not they strut around as tame as pigeons."

MORE THAN A ONE-MAN JOB

—Fitzpatrick, in The St. Louis Post-Dispatch.

Mermaid Plans Second Trip Across Channel

California Girl Says Swimming Channel One Sure Way To Keep Figure

NEW YORK.—Florence Chadwick, who'll swim the English Channel the hard way this fall, gave credit to such activities for keeping her figure the way she wants it.

The California mermaid, who set a new women's record of 13 hours and 20 minutes in her swim from Cape Gris Nez, France, to Dover, England, will wade into the waters off Dover this August, bent on making the swim from west to east. One man has done it before her.

"You have to work those tides just right, so you come in and hit the cape on the nose," she said, "otherwise you're swept past it and you have too many miles to go before you hit land."

As it is, Miss Chadwick estimated she'll have to swim about 23 miles to make the crossing.

Besides all the honors involved if she makes it, Florence said it's one swell way to make sure she keeps her figure under control.

She said the average American girl fails to do this after the age of 25. "Swimming could help them stay in shape," she said, "but they won't go to the time and trouble."

The 30-year-old Miss Chadwick is in training at New York's Henry Hudson Hotel for her second aquatic adventure. Twice a day she dives into the hotel pool and swims at the end of a 25-foot rope, until she has churned off a three-mile stretch. She does her standing-still three miles at about six o'clock in the morning and again at around 10:00 p.m.

"I work so hard I can eat like a horse and never put on a pound," she said, "all I have to do is give up candy and highballs."

Florence goes dating most evenings in town, but objects to staying in night clubs too long.

"Those curtains of smoke," she said, "it's like breathing sulphur."

She said she tries to get her boy friends to take brisk walks with her, but admitted it has resulted in a pretty steady change of names in her date book.

"New York men are so spindly," she said, "You can put your hand clear around their calves. No stamina."

She said she likes to walk a mile in about 12 minutes, while most Manhattan gents she has met consider 25 minutes a fairly rapid pace. That, Miss Chadwick scornfully pointed out, is the time she needs to swim a mile.

When a current swain balks at walking, Florence said she always recommends a good swim as a night cap.

"About a mile, in real leisurely fashion," she said, "is what I think

Small Fry Will Agree With Him

(By The Canadian Press)

If fonetic spelling were brot into the skools Johnny mite get thru more easily.

Dr. John Dearnness of London, Ont., who has just attended his 80th annual convention of the Ontario Educational Association in Toronto, feels that a simplified system of spelling could almost wipe out the subject from the school curriculum.

Dr. Dearnness, who will be 99 in two months, said in an interview that he does not favor the 40-letter alphabet sponsored by the late George Bernard Shaw.

He agreed with Shaw that there are not enough letters in the present alphabet to take care of all sounds in the English language, but felt it more practical to correct the situation through simplified spelling than to complicate matters by introducing new letters.

"Our teachers take a great deal of time teaching children ways of spelling that have no rhyme or reason at all behind them," he said.

Typical changes suggested by Dr. Dearnness are nite for night, bot or bawt for bought, trof for trough—and fonetic for phonetic.

STANDARD BRIDGE

By M. Harrison-Gray
Dealer: South.
Game all.

N.		E.	
♠ 10 7 3		♠ A K J 5	
♥ 9 8 4		♥ 6 3	
♦ Q 6 5 2		♦ 8 7 3	
♣ 10		♣ K 5 2	

When South opened One Heart at rubber, Bridge, North had an obvious raise to Two Hearts on the strength of his ruffing values. South, with 18 points and only 5 losers, jumped to Four Hearts in spite of his shortage in trumps.

West made the good lead of ♠ 3, so South's line of play was to run ♠ 6 at trick 2, losing to ♠ J. The defence took two more rounds of trumps, ♠ 9 was then led to East's ♠ A (a deliberate false card) and ♠ 9 was returned. When the Diamond suit failed to break, ♠ Q was led from dummy and East made the mistake of not covering. South discarded ♠ 4 and the lead was still in dummy for the winning Club finesse. The defence had South in trouble until the slip-up at trick 8.

best, any more than that may tire you too much to sleep."

On that basis, her companions must all have insomnia. She said she usually has to fish 'em out at the half-mile pole.

A light heart lives long.

On The Side : E. V. Durling

Industrialist's Philosophy

Some organizations appear opposed to engaging men of over forty years of age. Henry Ford was never that way. Before World War II there were 123,562 men in the Ford organization; 47,156 were over 40 years of age, 28,576 over 45 years of age, 6,377 over 50 and 198 over 70. Ford once observed: "Age brings experience. As a man grows older he may work more slowly, but he is also far more conscientious and the lifetime of skill he brings to the job compensates for any lack of speed."

Honest Slogans

Somewhere in my travels I saw a sign over a used car lot reading "The Surly Scotchman". It interested me. I meant to write to this man and suggest a few slogans he could use. For example: "I Sell Cars, Not Handshakes", "I will Give You Value, But Don't Expect Me to Kiss You", or "Don't Try to Bargain with Me. Life is Too Short. I Have One Price. It's the Right Price. Take It or Leave It." I believe such slogans would appeal to people with a sense of humor and give the impression the dealer was a regular fellow, possessed of the virtues of honesty and sincerity.

Hearty Eaters

It is repeatedly claimed eating too much has a tendency to shorten a man's life. I do not wish to dispute this claim. However, there are and have been exceptions to this rule. Quite a few heavy eaters have achieved longevity. As for example take the great diarist, Samuel Pepys, who lived to be seventy years old at a time when the average man was only living to be forty or thereabouts. In the diary of Mr. Pepys you will find the following entry: "Home from the office to my lodgings, where my wife had got ready a very fine dinner, viz.: A dish of marrow bones, a leg of mutton, a loin of veal, a dish of fowl, three pullets, two dozen larks all in a dish, a great tart, a neat's tongue, a dish of anchovies, a dish of prawns and some cheese."

Typewriter Inventor

Who invented the typewriter? How many different makes of typewriters have been on the market? Does your secretary know the answer to these questions? If not, let her take ten minutes off the time she stands in front of the mirror patting her hair and use it to study the history of her type of occupation. The first practical typewriter was invented and developed by C. Latham Sholes in Milwaukee in the period of 1867-1873.

Handwriting Analysis

A young woman who has been studying the handwriting of the admirer she likes above all others asks: "What does heavy writing indicate? Strength of character, doesn't it? Heavy, inky handwriting indicates the writer has decided opinions, strong willpower, confidence in himself, inclined to have a bit of a temper and is somewhat egotistical. He is best handled by a woman who understands the art of subtle flattery. Or so say the handwriting experts."

HERE'S HEALTH

TRY AND STOP ME!

By BENNETT CERE

A man who sells old age annuities for a big insurance company searches the "business and finance" pages of all the papers assiduously for photographs of young executives who have secured promotions or assumed new posts. He has these photographs expertly retouched to make the prospects look like codgers of 80 or 85, and mails the resultant works of art to said prospects' homes, attaching his business card and a note reading: "What are you going to do to make life secure for this old man?"

Does the system work? He's sold more old age insurance than any other three solicitors in the agency combined.

103rd DONATION OF BLOOD—Miss Isobel Hulme, commandant of the Canadian Red Cross Corps, Montreal detachment, offers a feed of doughnuts to her cousin, R. C. Hulme, after he had given his 103rd donation of blood at the blood donors' clinic in Montreal recently. In all, Mr. Hulme has donated more than 22 gallons of blood to various services in a half a dozen countries.

PREPARING FOR CIVILIAN LIFE — A Korean foxhole is not the most comfortable of reading positions for this U.N. soldier, nor is his literature of a very comforting nature. His pocket book is on the subject of how to survive an atom attack.—Central Press Canadian.

PARATROOPS BECOME AMPHIBIOUS — "Operation Mars", which dropped French Colonial commando-paratroops into the jungle warfare of Cochinchina, sets a new pattern in the long fight to subdue the rebellion headed by Ho Chi-minh. In contrast with their successful airborne landing, the Colonials here waded a stream on the southern Indo-China fighting front.—Central Press Canadian.

TINY TOTS ARE LIFE-SAVERS—Two small citizens of Atlanta, Ga., ages three and four, are credited with two remarkable rescue feats. Lewis Talmadge Glosson, age three, took charge like a veteran when his mother fainted in their home. He pulled his baby chair up to the kitchen sink, filled a cup with water, then climbed down, as shown left, washed his mother's face before calling in neighbors. Right, Alton Lyon, aged four, was alone with his 230-pound father, who decided to take a hot bath to relax when he was stricken with a heart attack in the tub. Alton happened to look into the bathroom just as his dad slipped under the water. Without hesitation the boy pulled the plug and drained the tub. When his mother returned, she found her husband recovering from the attack. He couldn't remember what happened, but Alton did.

FLOATING TANKERS KEEP H.M.C.S. NOOTKA IN ACTION — A fleet tanker refuels two destroyers in Korean waters all in one operation. Taking fuel from alongside the tanker is the Royal Navy destroyer, H.M.S. Ceylon, and through a fuel line from her stern H.M.C.S. Nootka takes on fuel. The tanker is part of the all-important supply ships which provide fuel to their fighting sisters.—Central Press Canadian.

DEVASTATION—The photo above shows one of the devastated homes in Pointe aux Trembles, Que., a suburb of Montreal, following a flood which forced 75 per cent. of the residents homeless. Two hundred houses in the district have been affected by the swollen St. Lawrence River. Only water invaded the streets at the start of the flood, but, recently large blocks of ice moved in towards the houses. The ice floes slammed against the houses like battering rams, completely demolishing two and knocked countless others out of shape. The photo below illustrates the devastating ice blocks (background) which moved in with the water.

FAILED TO "SHED" HER 4th HUSBAND—Camera-shy Woolworth heiress Barbara Hutton is pictured on her arrival in New York from Mexico City after failing to win a "quickie" divorce from her fourth husband, Prince Igor Troubetzkoy. The American Princess, reported "very ill" gives proof to this statement in picture above.

U.N. AGENCY SAVES KOREA ORPHANS — Dr. Kin Tae Ryong of Seoul university medical school examines one of the thousands of South Korean orphans evacuated to an island off South Korea by a United Nations relief agency. Though thousands of children roam across the war-torn peninsula without food, shelter or parents, the U.N. has managed to care for many who would otherwise have died.—Central Press Canadian

By W. S. Backman, Field Supervisor, Agricultural Service Board, M.D. Kneehill No. 48

Wide awake and energetic western farmers are usually receptive to new ideas, new methods, new conceptions. Good seed is quickly accepted as an important part of farming operations. All that leads to greater economy and efficiency, greater satisfaction with farm life, and confidence in the future of this great land is important. Good seed, when brought into general use, will mean more efficiency in the production of crops and insure greater future for those

Good Seed Week has come and gone. The co-operation of the press, radio, speakers and farmers has been most encouraging. Good Seed Week is an indication of the growing realization of the part that good seed plays in the production of better crops. To be of practical value the lesson must be taken to heart and applied when the crop is being seeded this spring.

Good seed consciousness is definitely growing among Alberta farmers. They are being quite particular about the quality and purity of the seed they sow. The increased interest in seed cleaning equipment is evidence that the idea of good seed is taking hold.

One farmer, Glen Brown, who lives four miles east and a jog north of Acme has installed good seed cleaning equipment. It is capable of cleaning at least 50,000 bushels of clean seed each season. He purchased this equipment so he could market all the grain he grows as clean seed.

It is a profitable business. He can increase his earnings by at least 15 cents per bushel for all the grain his land will produce. On 3,000 bushels, after all expenses for cleaning are deducted, he can make a clear profit of \$450.00 above what he would have been paid for the uncleared grain. He will have valuable feed for his livestock. In addition he can clean seed for twenty farmers in his vicinity. This will mean an additional revenue of \$10,000.20 in profit to this small community. Another stationary seed cleaning plant will soon be in operation near Trochu. This improvement in the seed cleaning facilities is visible evidence of good seed to the farmers in this district.

District or municipal seed cleaning plants, such as have been established in four municipalities in Alberta is the final classification under which we will discuss seed cleaning equipment. These are equipped with the most modern and largest cleaning equipment available. Wind separation on a very accurate grain or density basis is used. Speed of machine operation is accurately controlled. Self cleaning of all parts including hoppers, legs and bins prevents contamination or mixing of varieties. The facilities for handling grain in large volume red-

ices the cost on the per bushel basis. The building is especially designed and constructed for handling and storage of seed grain. Screenings are properly handled so they will not get another chance to grow. Seed treatment with the most up to date machine and chemical is used to prevent the spreading of grain diseases and increase the germination of seed grain.

The presence of seed cleaning equipment and plants of this capacity in a district will raise the standard of seed grain used and grown. It will establish the reputation of the district as a source of seed grain. Farmers from outside the district will come there for their seed grain because it is known to be good seed. Farmers who live near those who clean their seed at the plant will benefit as a result of buying seed from them. This is actually happening in the four districts where municipal seed cleaning plants are now

Good seed will reduce the annual loss from dockage in this district from \$29,000.00 to zero. This saving will pay for the municipal and farmers share in a seed cleaning plant here. With

good tillage practiceit will eliminate weeds and the loss they cause each year. Space in grain cars will not be wastedin haul-

ng dockage to the terminal ele- available and get your seed
vators. Freight charges will be cleaned early. Let "Good Seed
saved. Start now on a clean seed for Better Crops" be your slo-
program. Use the facilities now gan for 1951.

THE NEW 1951 BUICK offers Dynaflo automatic transmission as standard equipment on the Roadmaster series and as an option at extra cost on the Custom series. Buick marks its return to Canada after an absence of three years with completely new bodies, a new grille which flexes with the bumper, reducing the possibility of damage, the famed Riviera styling in certain models, new brakes, a choice of two new and more powerful Fireball engines and many mechanical features. Buick for 1951 offers a variety of models including a convertible and two "hard-top" convertibles. Shown here is the Buick four-door six passenger Custom sedan.

For National Safety...

You are needed now
in the
RCAF

In these times, it is the duty of every Canadian to consider first the national safety of our country! It is the duty of every young man to do his part to strengthen our armed forces—to meet aggression—when-ever and wherever it may strike!

The Royal Canadian Air Force is expanding rapidly. More good men are needed NOW—in all branches. Particularly is there need for men to train as skilled aircraft technicians to maintain the flying efficiency of Canada's military aircraft.

YOUR
ROYAL CANADIAN AIR FORCE
HAS IMMEDIATE
OPENINGS FOR MEN
TO TRAIN AS:

AERO-ENGINE TECHNICIAN

If you can qualify: act now.

To join the
Royal Canadian Air Force
you must

- BE BETWEEN 17 AND 40
- BE PHYSICALLY FIT
- HAVE GRADE 8 EDUCATION
- BE A CANADIAN CITIZEN
- OR BETTER
- OR OTHER BRITISH SUBJECT

Avoiding Injuries

A great deal of research has been done on athletic injuries—how they happen, when they happen, why they happen. Many a brilliant career has been ended or promising young athlete sidelined because of something that apparently couldn't be helped.

Yet research has shown that when special precautions are taken, the number of injuries decreases, particularly among young athletes. Injuries, both major and minor, follow certain patterns.

Where?

They hit poorly developed athletes in weak muscles and inflexible joints. Check yourself for underdeveloped muscles, not only by looking in the mirror but by figuring out what tires first during activity. Try to build them up, particularly neck, shoulder, back and stomach muscles.

Plenty of twisting and stretching exercises every day will decrease the danger of injury to joints. Concentrate on the knees and shoulders.

When?

Statistics reveal that most injuries occur either at the beginning or near the end of any game. Poor warm-ups are the cause of most early game injuries. Late injuries occur because the athlete is tired, and the only answer is the development of enough physical stamina to carry you through the game without undue fatigue. A good warm-up should always include plenty of stretching exercises.

Why?

Tension is the answer in many injuries. When your muscles are tight they are more easily strained or torn, and you lose co-ordination. This means, perhaps, that you won't be able to duck a fast ball. One good

answer to tight muscles is a program of stretching exercises, done every day. Also, try to develop a smooth, relaxed, organized style of play without jerky movements.

What?

Equipment that does not fit properly, or too little equipment, is an invitation to Old Man Injury. A person who wears all the equipment designed for a game is not a sissy, but smart? If yours doesn't fit properly, perhaps your mother or girl friend can help out by making some alterations. A survey disclosed that only four young athletes in 10 wear a supporter; this is a mistake! They help avoid injuries and actually sustain energy and endurance. A good supporter should be light, snug-fitting and durable. It must be kept clean, and should be replaced at the slightest loss of elasticity. A good idea is to have two.

Who?

Athletes who play with confidence and abandon are not easily hurt. Fear of injury is actually one of the causes!

You can become a member of the largest coaching service in the world by writing a letter to "Sports College, Box 99, Toronto 1, Ontario". Membership is free, and specially prepared books of instruction on all sports can be obtained.

Additional coaching and advice by famous athletes can be heard on the Sports College radio program every Saturday afternoon. Look up the time and station in your area and become a regular listener.

Agricultural Experts Predict Good Crop Year Everywhere

(By The Canadian Press)

A new planting season is at hand on Canada's farmland. A Canadian Press cross-Canada survey shows that, almost everywhere, agricultural experts predict a good year from the standpoint of acreage and variety of crops. By improving farm practices and using good seed, Ontario feed grain growers last year produced a record 200,000,000 bushels. This year they hope to grow 250,000,000 bushels.

Farmers consider this spring an early one in Nova Scotia and Newfoundland and relatively late in Ontario and Alberta. The after-effects of March floods will probably result in late planting in some parts of British Columbia.

This spring's moisture content in Alberta soil is regarded as better than for two years. Manitoba, Saskatchewan and Ontario farmers in general think moisture conditions favorable.

The winter's snowfall was light in southern Ontario but it gave crops the protection they needed. Fall wheat and alfalfa came through the winter well, as did pastures and

orchards. So far, new growth has not advanced so fast that it would be endangered by spring frosts.

Most of British Columbia's market gardening planting was done in March and the gardeners say 90 per cent. of the crop survived cold weather and storms late in the month. Peas, lettuce, cabbage and cauliflower from sections unaffected by last month's floods are expected on the market soon.

Alberta farmers have already started seeding grain in the Lethbridge area. Wheat planting is expected to be about the same as last year's 7,251,000 acres but crops experts believe farmers will increase acreage of oats and barley and plant twice as much flax as the 50,000 acres harvested last year.

Grain growers in Saskatchewan are expected to step up their acreage of rye, keeping that of other grains approximately the same as in 1950.

Do Not Sow Frozen Wheat Too Deep

SWIFT CURRENT. — Dealing with the value of frozen wheat for seed, Dr. J. B. Harrington, of the field husbandry branch of the University of Saskatchewan, stresses the necessity of not seeding frozen wheat too deeply, regardless of germination tests.

It is to be remembered that when seeding frosted seed it is important not to sow deeper than absolutely necessary to get the seeds into moist soil. Wheat that was fairly heavily frosted will not only be lower in germination, but young seedlings that do emerge will be most sensitive to depth of seeding, and then later sensitive to spring frosts and drought conditions.

Authorities also state that the rate of seeding will also have to be heavier than undamaged wheat in order to get the same stand.

Frosted Grain

Where frosted wheat, oats and barley is being used for seed, always increase the rate of seeding in proportion to the decrease in germination, then sow the grain as shallowly as possible to get seed into moisture, advises A. G. Kusch, cerealist at the Experimental Station at Scott, Sask.

Extensive frost damage to cereal grains occurred over a large area of the prairie provinces in 1950 and the damage was especially severe in Saskatchewan. Germination tests on cereal grains grown around Scott where frost damage was severe, indicated that wheat generally will give satisfactory germination, but oats and barley will not. Many samples of these grains, when tested, gave germination percentages below 40, with only a few samples showing 80 per cent.

When these frost-damaged grains were tested in soil, the number of plants emerging did not equal the recorded germination percentage. The lower the percentage germination of the sample, the more serious was the failure of plants to emerge as the depth of planting was increased. In addition, there were many weak plants present that would not survive under the average field conditions encountered in the spring.

Mr. Kusch adds, as the extent to which germination of cereal grains has been impaired by frost cannot be determined by examining the seed, all farmers concerned are urged to make, or have a germination test made, on the grain they intend to use for seed. Wheat may appear to be damaged severely by frost and yet show good germination and the reverse may be true. The germination of oats and barley may be seriously affected and still show little external signs of frost damage. In cases where germination percentages are low, it will be advisable to purchase good seed to ensure a satisfactory crop.—Farm News.

SMILE OF THE WEEK

"I suppose you carry a memento of some sort in that locket?" said one woman to another.
"Yes, a lock of my husband's hair."
"But your husband is alive."
"Sure; but his hair is gone."

Canadian Fashion

Jaunty red quills wing up from the curved pique brim of Piko's spring cloche.

Regina Started Clean-Up Drive Back In '89

When, in the May of way-back 1889, the town fathers in Regina sent an inspector to all the householders in their community telling them to clean up their front and back yards, they started something much bigger than they knew—and brought to Canada more beautification than they could have dreamed of.

For, unwittingly, they were responsible for Canada's first Clean-Up Campaign.

Since that May of 61 years ago, their effort to make Regina a cleaner, brighter, more attractive place in which to live has grown until now the annual Clean-Up, Paint-Up, Plant-Up, Light-Up Campaign is a dominion-wide effort with more than 500 communities sharing and with hundreds more finding their citizens following the beautification program without any actual local campaign.

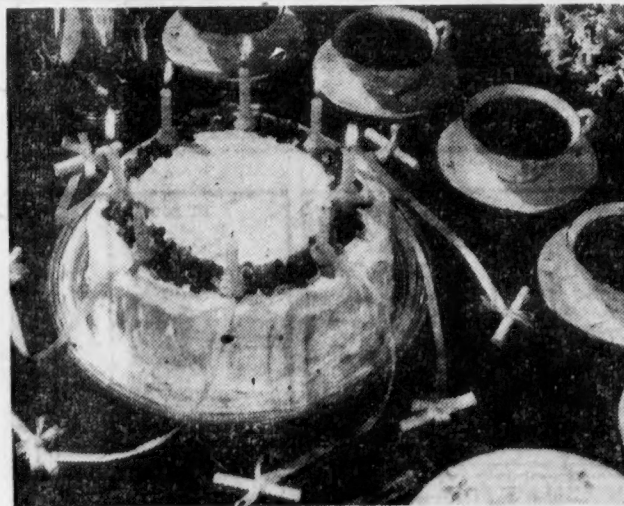

Many towns across the prairies as in the past are again sponsoring and playing their part in this year's campaign.

USE OF EGGS

People who eat two eggs a day get, among other nutrients, close to 100 per cent. of their daily vitamin D requirement, around 50 per cent. of the vitamin A requirement and 38 per cent. of their daily iron requirement.

England has more than 60,000 lakes.

: Selected Recipes :

Here's a birthday cake with a candle for each guest rather than for each year! A fortune or verse is attached to each candle, and when you cut the cake, let the fortunes fall where they may!

Birthday Cake

One cup shortening, 2 cups sugar, 4 eggs, unbeaten, 3 cups sifted flour, 1/4 tsp. salt, 3 tsp. baking powder, 1 cup milk, 1 tsp. vanilla, boiled frosting, tinted pink, 3 dried figs, chopped fine, 1/4 cup seedless raisins, 1/4 cup finely chopped dates, 1/4 cup broken pecans or walnuts, 1/4 cup finely chopped maraschino cherries.

Cream shortening and sugar. Add eggs, one at a time, beating well after each addition. Mix and sift flour, salt and baking powder.

Combine milk and vanilla. Add flour mixture alternately with milk to egg mixture. Pour into two greased and floured 9-inch layer cake pans. Bake in moderate oven, 375 degrees F., 35 to 40 minutes. Cool 5 minutes in pans. Remove from pans to cake racks. Prepare boiled frosting, tint pale pink. Combine fruits and nuts and add about half of this mixture to one-third of the frosting; spread between layers. Frost top and sides with remaining plain frosting; garnish with wreath of remaining fruits and nuts. Decorate with small candles.

GARDEN NOTES

Thinning And Spacing Plants Important To Avoid Spindly Growth

Order Of Planting

Most garden things in Canada divide themselves into four groups, hardy, semi-hardy, semi-tender and tender.

In the first are those that go in just as early as possible. Frost will not hurt them at all, may in fact do them good. In this tough class are sweet peas, nursery stock and grass seed, also practically anything else of a perennial nature.

The second group include those that like to grow early and will stand some frost. These are mostly vegetables like lettuce, radish, spinach, garden peas, perhaps a short row or two of beets and carrots, and the first potatoes. One can risk the first sowing of these about as soon as the soil is fit to work. True, a real hard frost will damage them, but a few degrees will not.

In the third category are plants that will stand some pretty cool weather, even a degree or two of frost, but they don't like it. They should not be risked outside until practically all danger of frost is over. In this group will be most of our annual flowers — cosmos, zinnias, marigolds, petunias — and beans, potatoes, corn, cabbage, perhaps even a few tomato plants among the vegetables.

Last of all we have the really tender things. Frost is fatal to these and they don't like and will not thrive in cool weather or cool soil. Among the flowers are the cannas, gladioli, dahlias, and in the vegetable category cucumbers, melons, squash, peppers and such. When the season is ready for these it is also the best time for the main plantings of corn, tomatoes.

GEMS OF THOUGHT

MARRIAGE

Kindred tastes, motives, and aspirations are necessary to the formation of a happy and permanent companionship.—Mary Baker Eddy.

There is no disparity in marriage like unsuitability of mind and purpose.—Dickens.

Show me one couple unhappy merely on account of their limited circumstances, and I will show you ten who are wretched from other causes.—Coleridge.

The happiness of married life depends upon making small sacrifices with readiness and cheerfulness.—Selden.

Man and wife are equally concerned to avoid all offense of each other in the beginning of their conversation. A little thing can blast an infant blossom.—Jeremy Taylor.

Men and women, in marrying, make a vow to love one another. Would it not be better for their happiness if they made a vow to please one another?—Stanislaus Leszczynski.

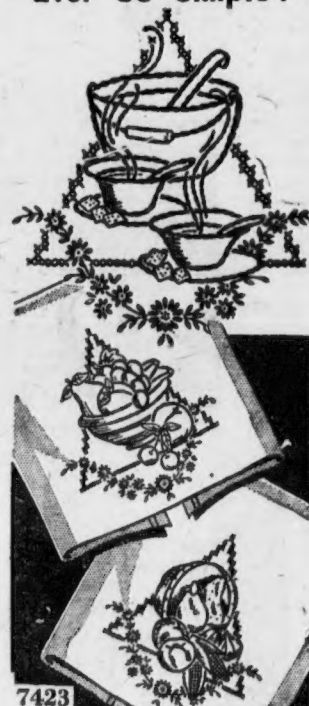

Must Have Room

A most important job, after the plants are up, will be thinning and spacing. This is vital work and applies to either flowers or vegetables. Crowded flowers will grow thin and spindly, will not bloom freely and the biggest plants will topple over in the first storm. They should have half as much room between as they will grow tall. This means about 4 or 5 inches for things like nasturtiums, less for alyssum, much more for tall marigolds, cosmos or spider plants.

With the smaller vegetables, a couple of inches between plants is sufficient. This applies to leaf lettuce, early carrots, beets, etc. Beans and peas should have from 4 to 6 inches between plants, and as all the seed usually germinates it should be planted about this far apart. Rows should be from 15 inches to 2 feet apart. Corn is usually planted from 3 to 6 seeds to a hill, about 18 inches apart each way, or rows 2 to 3 feet apart. Tomato plants require at least 18 inches each way; melons, squash and cucumbers three plants to a hill, and hills about 2 to 3 feet apart.

Patterns

Ever So Simple!

Heavy Schedule For Man. League

BRANDON, Man. — A 64-game schedule starting May 19 was approved by the five-team Manitoba Baseball league at a special meeting.

The league also hired two umpires, Jack Carrigan of Winnipeg and Mark Van Buren of Indianapolis, Ind., who will rotate around the league.

Minot, N.D., Mallards, Brandon Greys, Carman Cardinals, Winnipeg Buffs and Elmwood Giants all reported progress with their clubs. The Buffs and Giants have started their training season in the southern states, while the other three teams expect to commence training on home diamonds the first week in May.

During a storm in Natal, South Africa, in 1874, hailstones weighing a pound and one-half fell.

OUR COMPLETE SHORT STORY—

A Moment Of Bliss

In Kitty's Wan, Wistful Face
Was Longing And Hope.

By Louis Arthur Cunningham

TO THE many who passed down the street below the great elm on the corner of the common she was just a pale, sickly woman watching wistfully, enviously from behind a chill window-pane those healthier and happier than she.

But they scarcely did Miss Kitty justice. True, she did look with wistful eyes at the bustle and vim of life; she was only twenty-four. But she knew life better than many of the quick because she had her thin hand forever on its pulse. Just a cold pane of glass? Ah, no! It was far more to her. It looked upon a vast stage where the whole world acted.

Each day they performed for her. Youth and Age, Wealth and Poverty passed in the street. Rich men, poor men. Miss Kitty saw them all and envied none; until the lovers came.

Across the street from her window was a great old elm whose leaves in summer sighed soft whisperings of love. And there each night they met. To Miss Kitty, who could walk very little because she was lame and her heart had a queer, capricious trick of almost forgetting to work sometimes, the alert, living grace of the lovers was a wondrous thing. Once in a great, great while she ventured out with her brother Aaron who worked in the iron foundry. With Aaron's great, strong arm to support her it was easier. But these two... what did they know of pained inactivity, of hopeless solitude?

"What would I not give to be in her place for a minute, for just a

little minute!" sighed the invalid as she watched them when they met beneath the elm. "To stand there in the shadow and wait for his coming as she does! To feel his arms around me! To be kissed once... only once!" In that desire was the supreme emotion of Miss Kitty's life.

In the evenings the girl would wait for her lover and as the days went by their love grew more strong and flowered. The invalid watched them happily. Sometimes she could fancy herself in that girl's place and see the tall, fair-haired fellow stoop to caress her.

Then one night they quarreled, perhaps because their love was too great, too delicately reactive to the jarring unkindness of life. They separated in anger. They walked away in different directions from the old elm, which looked desolate and forlorn.

Miss Kitty cried that night. Her heart ached almost as much as her crippled body; she felt as sad as either of them who had parted. It seemed as though the bottom had dropped out of life and the music of love turned to clashing discord. Miss Kitty cried herself to sleep, and into a beautiful dream from which she awakened with a smile on her lips. How brightly the sun shone that morning and how merrily the birds in the old elm sang their carols to the dawn!

She did not come that night. The boy came, waited long beneath the elm and walked disconsolate away. The invalid thought, a little unkindly,

FIRST CANADIAN JET PILOT TO FLY ATLANTIC—Squadron Leader Cal Bricker, D.F.C., 29, of Grenfell, Sask., is the first Canadian pilot to fly the Atlantic in a jet plane. He made the flight last July, while on exchange duties with the U.S. Air Force, in an American Thunderjet. Born in Regina, S/L Bricker joined the R.C.A.F. in January, 1940, went overseas three years later, and won the D.F.C. while flying a tour of operations on Spitfires. He was back in Canada, recently, discussing jet-fighter operations with officials at Air Force Headquarters in Ottawa.—National Defence Photo.

of the foolish pride of a girl who was so slow to forgive. In her wan, wistful face was longing and hope.

That night Aaron was late. It would be nine o'clock before he would return. Miss Kitty spent an ecstatic half-hour with a hand mirror, arranging her pretty, rebellious hair. She had dressed herself in her very best. She was ready to go on a great adventure.

At dusk the invalid felt her way down the stairs. How long they seemed, how rough and hard. Yet they were the alley to Paradise. Beneath the elm, just as the dark descended, in the gloom of the leafy branches Miss Kitty leaned against the gnarled trunk. The hard bark was a velvet cushion against her shoulders.

Her heart performed strange little capricious when she saw him turn the corner. He was walking quickly. There was eagerness in his step. And when he saw the slim figure in the shadow of the tree his step was quicker still and joy was in his outstretched arms.

"Phryne!" he murmured. Miss Kitty saw the stars go tumbling around the moon. His arms went about her body, enveloping her, pressing her to his breast till it hurt... hurt gloriously. And his lips stayed on her mouth a long time... long enough for her thin hand to pass gently through his hair.

She watched him cross the common. She knew what he had experienced... expectancy, ecstasy, disillusion, confusion. Often he glanced back to see if another girl had come. What had he said? It was a mere blur of speech. All she recalled was "mistake... another." To him it had been bitterly ludicrous; to her, life's happiness compressed in a moment of bliss.

Back up the long alley of stairs to the heaven of memory Miss Kitty went. Her limbs pained, her body ached, her heart... well, at least, her spirit sang and was glad.

The next night the girl was there. Miss Kitty smiled when he hesitated before he kissed her. Then they walked away, he telling her something at which they both laughed.

Plan Sulphur Plant For Alberta

CALGARY. — The Albertan, in a recent newspaper story said that Royalite Oil company plans to erect a sulphur processing plant in Turner Valley. The plant would have an initial capacity of 8,000 to 9,000 tons a year.

The story says several Turner Valley operators have signed up for the processing.

Royalite has asked the operators to agree to the manufacture and sale of sulphur resulting from the processing of the gas for a 10 per cent. royalty.

The sulphur price expected in 1952 is \$17 to \$20 a ton.

The refining of sugar is believed to have begun in Persia. 2929

WHY SUFFER PILES

Grateful users praise quick results. Relief from Pain—and soothing comfort—from Mecca Pile Remedies. Two kinds—Number 1 for protruding Piles. Sold in tube with perforated pipe for internal application. 75c. Number 2 for external Piles. Sold in Jar, 75c. Order by number from your Druggist.

Boost Social Welfare

VICTORIA, B.C.—A boost of \$5 monthly to social welfare recipients has been announced in the B.C. legislature by Hon. Douglas Turnbull, health minister. The increases will be retroactive to April 1. Single persons will now get \$40 a month, while a unit of two will receive \$60 monthly.

\$989 For Calf

BRANDON, Man. — Bruce Campbell, 14, of Chater, Man., was almost \$1,000 richer following the fat cattle sales at the Winter Fair here. His Aberdeen Angus calf, Banker, established a post-war high for fat cattle sales at Winter Fair when the T. Eaton company limited, purchased it

for \$1 a pound (less four per cent. for shrinkage) making a total of \$989 for the steer.

Bigger Crew

EDMONTON. — A crew of about 200 men will be employed this year on development work at the uranium plant at Beaverlodge, Sask., officials of Eldorado Mining and Refining Co., Ltd., reported. About 125 men now are employed.

Baseball Entries

MEDICINE HAT. — Five entries already have been received for the eight-team baseball tournament to be held June 16-18. Entries are Eston, Sceptre, Swift Current, Indian Head, and California Mohawks of this city. Prizes will total \$4,400.

FESTIVE—quick to fix!
with Modern Fast-Acting DRY Yeast!

FAN TANS

Measure into large bowl, ½ c. lukewarm water, 1 tsp. granulated sugar; stir until sugar is dissolved. Sprinkle slowly with 1 envelope Fleischmann's Royal Fast Rising Dry Yeast. Let stand 10 min., THEN stir well.

Scald 1 c. milk and stir in 5 tbs. granulated sugar, 2 tps. salt; cool to lukewarm. Add to yeast mixture and stir in ½ cup lukewarm water. Beat in 3 c. once-sifted bread flour; beat well. Beat in 4 tbs. melted shortening. Work in 3 c. more once-sifted bread flour. Knead until smooth and elastic; place in greased bowl and brush top with melted butter or shortening. Cover and set in warm place, free from draught. Let rise until doubled in bulk. Punch down dough in bowl, grease top and let rise again until nearly doubled. Punch down dough and roll out, half at a time, into a rectangle a scant ¼" thick; lift dough, cover with cloth and let rest 5 min. Brush with melted butter or shortening; cut into strips ½" wide. Pile 7 strips together; cut into 1½" pieces. Place cut-side up in greased muffin pans; separate slices a little at top. Cover and let rise until doubled in bulk. Bake in hot oven, 400°, 15-20 min.

• Always running short of yeast because it spoils so quickly? End this nuisance — switch to modern Fleischmann's Fast DRY Yeast! Keeps full strength and fast-acting right in your cupboard — no refrigeration! No new recipes — one package equals one cake perishable yeast in any recipe.
